

NDT LEVEL 3 SERVICE

Level 3 services encompass a wide range of critical functions essential for ensuring the highest standards in non-destructive testing (NDT). This includes tasks such as developing and reviewing clients' written practices for qualifying and certifying NDT personnel, crafting NDT procedures, verifying personnel qualifications and certifications, conducting rigorous training and qualification testing, and representing clients in discussions with various stakeholders. Additionally, Level 3 services extend to the development of calibration standards, ultrasonic testing, and equipment selection, as well as providing expert witness testimony, deposition support, and third-party advocacy services. These comprehensive services form the backbone of a robust NDT program, guaranteeing accuracy, compliance, and excellence in inspection practices.

Ensuring adherence to the most recent specifications and codes is fundamental to your NDT Method program. Your staff is adequately trained and equipped to carry out their responsibilities effectively. Comprehensive records, log books, and certifications are meticulously maintained and accessible for audit purposes. Supervisors are well-versed in the necessary procedures and protocols for supervising NDT Technicians on-site. As a result, your customers benefit from an enhanced, more comprehensive range of products and services.

Benefits of NDT Level 3 Services:

- Ensures compliance with the latest industry standards, meeting or surpassing current requirements.
- Maintains updated personnel records for NDT education, training, certification, and qualifications.
- Establishes audit-ready procedures to withstand third-party audits at any time.
